

Keep an eye on your health

As part of the vision care plan, EyeMed offers a diabetic eye care benefit for members with diabetes. Whether it is type 1 or 2, we understand the important links between diabetes and vision. That's why it's so important for us to offer vision care options that meet the needs of members who may have special vision concerns.

Why?

Diabetes is a growing epidemic that carries an increased risk of glaucoma, cataracts and the most common diabetic eye disease, retinopathy¹. We always recommend that our members receive an annual eye exam but, for those with diabetes, more frequent monitoring may be necessary.

How?

- ▶ This benefit allows for an additional office visit and diagnostic testing to monitor signs of diabetic ocular changes.
- ▶ Your doctor will determine what diagnostic tests are necessary.
