

# A picture is worth a thousand words

And a retinal image can be worth much more. As part of your EyeMed vision benefits, we offer savings on retinal imaging, so you can pay less and your doctor can see more.

## What is so great about retinal imaging?

- The high-resolution images of the inside of your eye can help your doctor identify the early signs of common eye conditions. They also provide a historical baseline of your eye health, allowing your doctor to compare images year-over-year and identify any changes.
- Retinal images also enable you to see what the doctor sees when looking inside the eye. You'll be able to review them with your doctor and better understand your eye health.

Contact your provider directly to find out if retinal imaging service is offered.
